## **“Entrepreneurship in a regional perspective. Function of institutions, innovation, history and LGUs support”**

### **Call for papers to a Special Issue of Post-Communist Economist (P-CE)**

<https://www.tandfonline.com/toc/cpce20/current>

**International Science Exploration Event 2019  
Seminar 7<sup>th</sup>-8<sup>th</sup> of November, 2019 in Rzeszow, Poland**

### Topic

Entrepreneurship has multiple determinants. They range from history, through institutions, to local government policies. Although the research on entrepreneurship plays a crucial role in modern economy and finance, the factors responsible for new businesses formation are still under debate. The background for this discussion very often is created by features describing the historical experiences and unique local and regional conditions. Moreover, the role of local government policies in entrepreneurship support is still not sufficiently recognized. Therefore, there is still scope for analysing entrepreneurship from regional perspective, especially in post-communist countries. We look for contributions that investigate how history, institutions and local government policies shaping entrepreneurial activity in the region of Central and Eastern Europe (CEE).

### Examples of more specific research questions are:

- How history, institutions, and innovations determine entrepreneurship in CEE?
- What are the differences in tools available for local government in process of entrepreneurship supporting across CEE?
- Which policies for entrepreneurship support provided by local government are the most successful?
- What are the regional cultural traits, values and traditions conducive to innovation and entrepreneurship?
- What is the role of migration (both regional and cross-countries) in the persistence of innovation and entrepreneurship?
- What is the role of regional corruption and more generally quality of government as a crucial factor in entrepreneurship and innovation in CEE?
- What is different about innovation and entrepreneurship performance of regions after institutional shocks, including the end of the Soviet-type regime, and other historical disruptions in general? Is there the effect of the (still longer) historical knowledge base on entrepreneurship?
- What determines the level of persistence of entrepreneurial activities over longer periods of time? How can persistence of entrepreneurship be explained?

## Publication

Special Issue of Post-Communist Economies would be a result of International Science Exploration Event 2019 Seminar 7th-8th of November, 2019 in Rzeszow, Poland. Selected papers presented during the two days seminar will be considered for publication in Special Issue of PCE. Each paper will undergo a review process according to the procedure implemented by PCE.

## Abstracts and full papers

Extended abstracts of 2-3 pages should be send to the organizers until 15<sup>th</sup> of September 2019 ([tskica@wsiz.rzeszow.pl](mailto:tskica@wsiz.rzeszow.pl)). Decisions of acceptance for the seminar will be made until 20<sup>th</sup> of September 2019. Full papers should be submitted to the journal until 15<sup>th</sup> of January.
